Pathologies of the Nose and Paranasal Sinuses-I

The frontiers of endonasal surgery continue to expand at a rapid pace. The last three decades have seen a sudden surge in nasal endoscopic work on the sinuses and adnexae.

With the increasing number of workshops and courses being conducted all over the world, almost everyone has access to endoscopic surgery; and surgeons are constantly on the lookout for newer ways to expand the scope of this technology, steadily bypassing the limitations.

This is the first issue dedicated to pathologies of the nose and paranasal sinuses, dealing with pathologies affecting the sinuses and adnexae. The successive issues shall further enlighten the readers with a variety of conditions and their management.
